1980 Census of Population and Housing
County Summary Data
STF1

INTRODUCTION

This report presents summary 1980 Census counts for North Carolina and its 100 counties. The data represent tabulations of the 100 percent items from the Census questionnaire, i.e., those items which were asked on every questionnaire. The tables were obtained from the first Summary Tape File (STF1) for North Carolina.

There are three pages of tables for each county: (a) Characteristics of Persons, (b) Characteristics of Households and Families, and (c) Characteristics of Housing Units. Tables are numbered 1 through 55. A few tables are repeated on another of the three pages for ease in utilizing the data.

DATA FINDER GUIDE

The guide presented on the following page is designed to enable quick reference to the particular county page and table number for various topics of interest. However, this is not an exhaustive dictionary. In finding a particular table for a given county, use the Table of Contents to locate the county pages and refer to the Data Finder Guide for the table number and its page of location.

LIMITATIONS OF DATA

Caution should be exercised when using the data in these tables for several reasons. The racial categories of the 1980 Census are not strictly comparable to those of other censuses. In particular, data by race for Whites and for Asian and Pacific Islanders differ in concept between 1970 and 1980. Asian Indians were included in the Asian and Pacific Islander category in 1980 but were classified as White in 1970. The categories of Asian and Pacific Islander groups were expanded in the 1980 questionnaire. Also, the 1980 figures for some racial groups are not stictly consistent with 1970 totals because of significant changes in the way persons of Spanish Origin reported their race. These changes serve to decrease the category White and increase the category Nonwhite - Nonblack for North Carolina's 1980 census as compared with the 1970 definitions. Counts of the population by race in complete count tabulations are provisional. Final counts for race will be determined after the sample data have been processed. In addition, special caution should be observed in comparison of data for the American Indian population between 1970 and 1980, as there was a major correction of the 1970 counts which occurred after publication of the data.

Although these figures are considered final and will not be changed in subsequent publications on the 1980 Census released by the U.S. Bureau of the Census, total counts for both population and housing are still subject to correction. Once corrections occur, an errata notice will be issued by the Census Bureau, but corrections will not show up in the detailed tables of Census Bureau publications.

Users should be aware of the possibility of suppressed data in these tables, although suppression is more frequent at levels of geography smaller than a county. Data are suppressed in order to prevent the deduction of information about a particular individual or household. In general, data for persons (other than race or Spanish Origin counts) are suppressed if there is a count of 14 or fewer individuals in the area. Suppression occurs for housing unit characteristics (other than classifications by occupancy status) when there are fewer than 5 year-round housing units in the area. In some cases, complementary suppression is applied to prevent the derivation of suppressed data by subtraction. Only if there is a blank in a county table does the possibility of suppression exist. Often, it is possible, through addition or subtraction in one or more tables, to determine whether a blank represents a zero value or suppressed data.

OTHER DATA AVAILABILITY

Similar sets of pages of tables from Summary Tape File 1 for other levels of geography are available through the North Carolina State Data Center and its regional affiliate centers.

The North Carolina State Data Center is a Federal - State cooperative endeavor designed to increase and improve access to Census statistical products. In its service to public, private, and academic data users, the Data Center has among its objectives the expansion of access to and use of Census statistics, the provision of technical assistance and analytical support in the use of these statistics, and the provision of user training on census-related topics. The Office of State Budget and Management has overall responsibility for the State Data Center program and serves as primary contact with the Bureau of the Census. The Institute for Research in Social Science at UNC Chapel Hill and the State Library form a part of the umbrella structure of the Data Center and serve in differing capacities to meet the need for statistical information. A network of local libraries and planning region offices is organized to extend data availability throughout the State. A list of the names, agencies and telephone numbers of the Data Center participants can be obtained by contacting the Office of State Budget and Management, 116 West Jones Street, Raleigh, North Carolina 27611, 919-733-7061. Each affiliate office has copies of the data tables presented in this publication for various levels of geography in the service area assigned.

FOOTNOTES
1980 CENSUS SUMMARY TAPE FILE 1

1 The count of households in the complete count tabulations by definition equals the number of occupied housing units. In this document, the terms households and occupied housing units are used interchangeably.

2 Vacant seasonal/migratory units are excluded from all other tabulation matrices.

3 For data tabulated on a 100-percent basis, includes all persons in the category "Other". For sample data, excludes those persons who have a write-in entry of an Asian & Pacific Islander group in the "Other" category.

4 "Asian and Pacific Islander", in the 100-percent tabulations, includes: "Japanese", "Chinese", "Filipino", "Korean", "Asian Indian", "Vietnamese", "Hawaiian", "Guamanian", and "Samoan". "Asian and Pacific Islander", in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

5 Relatives include: householder, spouse, and the questionnaire categories: "Son/daughter", "Brother/sister", "Father/mother", and "Other relative". Tabulations of "Other relatives" include all categories not shown separately in the matrix.

6 Nonrelatives include the questionnaire categories "Roomer, boarder", "Partner, roommate", "Paid employee", and "Other nonrelative". Tabulations of "Nonrelatives" include all categories not shown separately in the matrix.

7 Tabulations of "Persons in household" based on 100-percent data by definition are the same as tabulations of "Persons in unit". The phrase "Persons in household" is used unless the matrix is stratified by a housing item such as tenure, plumbing facilities, etc., in which case, the phrase "Persons in unit" is used. Tabulations of "Persons in household" and "Persons in unit" based on sample data are not necessarily the the same due to differences in the procedures used to inflate sample population and housing data.

8 A "Child of householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own child of householder" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

9 Vacant housing units include the questionnaire categories: "For rent", "For sale only", "Rented or sold, not occupied", "Held for occasional use", and "Other vacant". Tabulations of "Other vacant" include all categories not shown separately in the matrix.

10 This aggregate, along with the relevant count will permit the computation of a mean. For example, the aggregate value for the owner-occupied noncondominium units will yield the mean or average value when divided by the number of specified owner-occupied noncondominium units, and the aggregate number of rooms for occupied and vacant year-round units yields the mean or average number of rooms with the appropriate division. (See footnote 14 prior to computing mean value or price asked.)

North Carolina State Data Center
Office of State Budget and Management
116 West Jones Street
Raleigh, North Carolina 27611
919-733-7061

11 The noncondominium value/price asked distribution is restricted to certain kinds of "ower-occupied"/"vacant-for-sale only" units. The following are excluded from the tabulations on value/price asked for noncondominium units:
   A. Units at an address with two or more units
   B. Units on 10 or more acres
   C. Units with a commercial establishment or medical office on the property
   D. Mobile homes or trailers
Value/price asked is tabulated for all "owner-occupied"/"vacant-for-sale" condominium units.

12 Contract rent is tabulated for all "renter-occupied"/"vacant-for-rent" units except 1-family houses on a property of 10 or more acres. Units tabulated in the "No cash rent" category are all occupied housing units reported as "No cash rent" except one-family houses on 10 or more acres.

13 Lacking complete plumbing (facilities) for exclusive use includes: complete plumbing (facilities) but also used by another household, some but not all plumbing facilities, or no plumbing facilities.

14 Multiply the aggregate value/price asked by $250 to obtain the true value or price asked. (The tabulation was scaled by a factor of $250 for tally purposes.)

17 The North Carolina State Data Center acknowledges the cooperation of the New Jersey Data Center in sharing a computer program to output tables from Summary Tape File 1. This program was used, with modifications, to produce printed output from Census Tape STF1 for geographical areas in North Carolina. (Does not apply to tables in microfiche products.)

18 Suppression of data occurs when there are fewer than 15 persons/5 occupied housing units in an area (except for total population and basic housing counts, race, and Spanish origin characteristics). Complementary suppression may be applied to prevent derivation of suppressed data.
